**Price** £ 8.99 €10.99

PUB DATE March  
25th 2024

A5 64pgs

This will be of interest to:

- Libraries who wish to support children in their computer development.
- Parents who want their children to have an advantage and boost their education.
- Basic Skills/EFL/ESOL/Primary teachers.

It is now accepted that our children will live in a digital world. This is why this book is important. It is an introductory guide that will help your child to learn coding skills and help them to develop problem solving skills. These skills are the thinking skills that will set your child apart from others and give them a major advantage in all their studies.

Parents, get ready to witness the joy of learning as your child embarks on an educational journey like no other. Designed for curious young minds, this book transforms coding into an exciting adventure. Each page unfolds a world of discovery, engaging children with vibrant illustrations and fun coding activities. Join the Button Friends in a celebration of curiosity, imagination, and the endless possibilities that await with each page of this delightful educational companion.

Let the Button Friends educational journey begin.

**Dr Fiona Carroll** is an expert in human computer interaction. She currently works at Cardiff Metropolitan University in Wales (UK) where she champions for more children, particularly girls, to embrace the world of coding and technology. She lives with her family in a small seaside town.
